

# TIPS

## FOR A SUCCESSFUL VIRTUAL INTERVIEW!

### Tip 1

#### **Dress to Impress**

Don't forget that a virtual interview is still an interview.

- Solid colors look better on camera, while shapes and lines draw attention away from your face.
- Dress and groom as if your interview were in person.

### Tip 2

#### **Choose A Great Space**

Your space matters.

- Find a space that has good lighting. Natural light from a window looks better on camera, but a lamp will do.
- Find a space away from noises and distractions.

### Tip 3

#### **Eliminate Background Distractions**

Using a virtual background is great.

- Avoid a cluttered space with clothes and other objects behind you.
- Move away from busy areas with traffic.

### Tip 4

#### **Check Your Connection**

Your internet connection is important.

- Check your internet strength and connection before your interview.
- Check your camera and microphone settings to make sure they are working.
- Use a desktop computer, laptop, or stationary device to eliminate issues with your camera moving.
